

Greedy Meshing

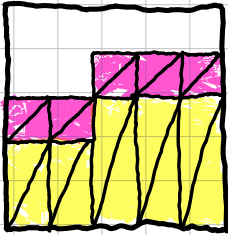

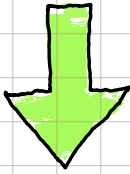

Scene uses
18 meshes

mostly
duplicates

how?

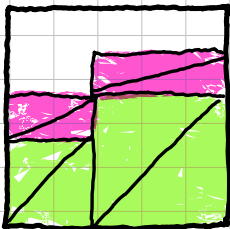

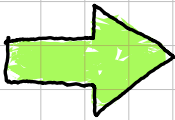

1. Skip air blocks
2. try combining down ↻
 - a. index in range AND
 - b. adjacent block is same type

down to
10 meshes

how?

3. try combining entire column right ↻
 - a. indexes in range AND
 - b. all adjacent blocks are same type

down to
only 4 meshes!

voilà!

Q: does prioritizing vert vs horiz make a difference?
