

Sequential Segments

- Each digit has a set of segments
- If we turn them on in order, it can look like someone is drawing them
- this will look nicer and sound better

Writing directions

0: 012345

1: 12

2: 01643

3: 1623

4: 5612

5: 05623

6: 054326

7: 012

8: 0561432

9: 65012

notice that
we can also
display hex

A: 450126

b: 54326

c: 643

d: 12346

E: 05643

F: 0564

coding it up

- arduino doesnt like lists so we can use a 16x7 array of ints
- we can use -1 as a flag to show the list ended

i.e.

digits[1] = [1, 2, -1, -1, -1, -1, -1]

digits[3] = [1, 6, 2, 3, -1, -1, -1]

etc.
