

hoberman linkage

$$\theta_{inc} = \frac{360}{n} \text{ deg or } \frac{2\pi}{n} \text{ rad}$$

construction

$$\theta_t = \pi - \theta_{inc}$$

links $\theta_t/2$ apart for even spacing

$$a = l \sin(\theta_t/4)$$

$$r_0 = \frac{a}{\sin(\pi/n)} = l \frac{\sin(\theta_t/4)}{\sin(\pi/n)}$$
